EDUCATION

BS Software Engineering, National University of Science and Technology (NUST)

CGPA : 3.52

EXPERIENCE

Junior web Developer

July 2023 - Sept 2023

Info aidTech

Remote

- Spearheaded the design and implementation of 15 captivating user interfaces using React and JavaScript, boosting user engagement by 25 percent through creating user-centric design principles.
- Improved frontend performance by 30 percent through innovative UI/UX techniques and technologies.
- Continuously honed skills in UI/UX principles, staying updated with emerging trends and technologies to implement innovative frontend solutions and improve InfoAid Tech's digital presence.
- Coordinated with teams to execute 8 projects, managing both frontend and backend aspects. Developed backend solutions to seamlessly integrate design elements and functionalities, ensuring a smooth user experience.
- Managed database tasks for 8 projects and integrated APIs for 5 projects, ensuring data integrity and security.

Frontend Developer Internship

Aug 2022 - Oct 2022

Pet Tech Homes

Rawalpindi

- Collaborated closely with a senior developer to build the Customer Tracker Pro app for Salla, actively contributing to frontend development tasks while also providing valuable insights and suggestions.
- Designed and implemented user interfaces for the app, completing 80 percent of frontend tasks independently.
- Resolved frontend issues promptly, maintaining an average turnaround time of 24 hours per task.
- Incorporated valuable feedback from stakeholders to iteratively refine design and functionality, which provided 15 percent increase in user satisfaction levels.
- Collaborated with the senior developer to optimize frontend performance, implementing strategic enhancements that resulted in a notable 25 percent decrease in page load times, thereby significantly improving user experience.

PROJECTS

MERN Ecommerce App. <https://mern-deploy-haroon8391s-projects.vercel.app/>

- Engineered a MERN Ecommerce App with interactive product filtering and integrated secure Stripe payment gateway, reducing checkout abandonment rates. Achieved 99 percent uptime on Vercel deployment, ensuring a reliable shopping experience. Implemented efficient login and registration methods, reducing user onboarding time by 40 percent and successfully deployed the application on Vercel.

Insightful Blogs Node.js, Express.js, MongoDB, React.js, Typescript

- Crafted a MERN stack blog platform with seamless user authentication, integrating Google signup/login via Firebase for enhanced security and accessibility. Engineered an efficient admin dashboard to streamline content management, reducing administrative workload. Demonstrated proficiency in frontend and backend development, resulting in a noticeable reduction in login errors and improved platform performance.
