EDUCATION

BS Software Engineering, National University of Sciences and Technology (NUST)
CGPA : 3.42

EXPERIENCE

Full Stack Developer

June 2024 - Sept 2024

BICS

Rawalpindi

- Developed NFT coin websites using React.js, transforming app mockups into fully functional applications.
- Built a full-stack e-commerce store on Salla for a client, using React.js for an interactive frontend, along with Node.js, Express.js, and MySQL for efficient and scalable backend development.
- Implemented responsive UI/UX components, integrated essential APIs, utilized Redux Toolkit for efficient state management, and added third-party services to enhance functionality.

MERN Stack Developer

July 2023 - Sept 2023

Info AidTech

Remote

- Led the design and development of 10+ dynamic user interfaces using React.js and JavaScript, boosting user engagement by 25% through innovative problem-solving and creative design solutions.
- Enhanced frontend performance by 30% through advanced UI/UX strategies, cutting load times by 40% and improve responsiveness, leading to a 25% increase in user engagement.
- Collaborated with cross-functional teams, managing frontend and backend for 8 projects, delivering all within deadlines and contributing to a 20% increase in overall project efficiency and client satisfaction.

PROJECTS

Talent Sync - MERN Stack [GitHub](#)

- Developed a job portal connecting recruiters and candidates, featuring secure authentication with role-based access control. Implemented a recruiter dashboard for managing job listings and applications.
- Designed a responsive UI that streamlines the hiring process, providing a seamless experience for users.

SnapGram - Next.js [GitHub](#)

- Built an Instagram-inspired social media platform with secure OAuth authentication, enabling users to upload pictures in real time with captions, like, and comment on posts for a highly engaging and interactive experience.
- Integrated real-time updates for instant content visibility and a seamless user experience.

ShopEase - MERN Stack [GitHub](#)

- Developed a secure e-commerce platform with robust user login functionality, enabling users to browse a wide range of listed products, view detailed information, and complete purchases seamlessly and efficiently.
- Integrated Stripe payment processing and a responsive interface to ensure a smooth shopping experience.

TECHNICAL SKILLS

Languages

JavaScript, TypeScript, Java, HTML, CSS

Frameworks/Libraries

Next.js, Node.js, Express.js, React.js, Redux, Tailwind

Databases

MongoDB, PostgreSQL

AWS

EC2, S3, Lambda, IAM, RDS, Elastic Beanstalk

Certifications

Data Structures and Algorithms (Udemy), Web Development (IBM)
